OFFLINE

Work on your mind maps anywhere, anytime

MindMeister [Offline Mode](#)

Now MindMeister allows you to work on your mind maps even when you're offline. Pretty cool, huh? Using the Google Gears offline library, you can now work on all your MindMeister maps wherever you are, without the need for an internet connection. When you come back online just slide the button and all your changes will be automatically synched!

Capture your ideas fast as lightning!

geistesblitz

Windows | iPhone | YAHOO! | iGoogle

Geistesblitz [Widgets](#)

Ever had a great idea that was gone again before you had the chance to jot it down? Well, with the new **Geistesblitz Tools** this won't happen again. You can insert ideas into your default mind map on MindMeister directly from your Mac Dashboard, Windows Sidebar or Yahoo! Widgets Desktop, without having to open a browser or log on!

Geistesblitz for your favourite Browsers

QUICKSEARCH for Internet Explorer 7 | QUICKSEARCH for Firefox 2.x | ACTIVITIES for Internet Explorer 8

Geistesblitz [Browser Extensions](#)

So you would like to insert Geistesblitzes straight from your browser? Then these nifty little add-ons are for you: without the need for any software installation you can submit ideas to MindMeister directly from the search field of your web browser, or use the **new Internet Explorer 8 Activities**. It requires Firefox or Internet Explorer 7/8.

Email & SMS Support

Capture your ideas wherever you are

Geistesblitz [Email & SMS](#)

But what if you happen to be somewhere on the road when you have any of your great ideas, I hear you ask? Well, fret not, with our new **Geistesblitz Email & SMS gateway** you can also text your brainwaves to MindMeister straight from your mobile phone, or send them – or even whole maps – in an email to your personal Geistesblitz address. Yay!

introducing the brand new mindmeister API

mindmeister

loves your application

MindMeister [API](#)

Want to integrate MindMeister with your own app? Create maps and ideas on the fly using simple REST calls? The MindMeister API allows anyone to write applications that interact with MindMeister. Check out the documentation and just download your API key to get started!
