

BlowerDoor MultipleFan: Airtightness Tests in Large Buildings

BlowerDoor Measurements of large buildings pose a particularly interesting challenge for measuring teams. In this seminar, you will learn how to set up and lay out the measuring systems, how to conduct the measurements, how to prepare the building, how to detect leakages, as well as how to draw up a proposal and provide a cost estimation for the measurement of large buildings like office buildings, production halls, etc. In addition, you will be trained in dealing with very airtight buildings like halls with oxygen reduction, and in guard-zone measurements, e.g. of apartments with access galleries.

Beginn:

Friday, September 6, 2024, 3:21 PM Uhr

Ende:

Friday, September 6, 2024, 3:21 PM Uhr

Veranstaltungsort:

31832 Springe

Germany
