

Embedded World Conference

THE BIRTH OF A NEW STANDARD

meet us at

embeddedworld
Exhibition & Conference

hall 1 / booth 406
April 9-11

Join us to learn about **remotely manageable embedded computer** and celebrate the birth of a new standard.

Meet Ci4Rail at Booth 406 in Hall 1!

As one of the initiators of the new standard for modular embedded box computers, EKF and Ci4Rail are jointly celebrating the official birth of ModBlox7. Visit us, touch the products, learn about the advantages of the standard and get to know the broad portfolio of Ci4Rail and EKF.

Moreover, our remote management of edge computers is now also offered for EKF's portfolio to monitor systems in the field, allow convenient software updates and thus manage the complete life cycle of YOUR solution!

Convince yourself at Embedded World 2024 and [make an appointment](#) with us right away.
