

# Advances in Chemical Biology

The upcoming "Advances in Chemical Biology" conference will feature **latest research** from all hot topics in **chemical biology**.

It covers the chemical biology of nucleic acids and proteins, peptides and carbohydrates and includes topics such as high-throughput assays, target identification, targeted synthesis concepts and phenotypic screening.

Lectures by young researchers and the **posters exhibition** will be at the heart of the conference. In addition to **many inspiring invited lectures**, the poster authors will have the opportunity to present their **posters in a short lecture session**.

The recipient of the [Richard Willstätter Prize 2024](#) will give a keynote lecture.

**Beginn:**

Tuesday, January 21, 2025, 12:00 AM Uhr

**Ende:**

Wednesday, January 22, 2025, 12:00 AM Uhr

**Veranstaltungsort:**

Frankfurt am Main

Germany

**Website & Anmeldung:**
