

Edmund Optics Innovation Summit - Harnessing the Power of Light

Light is the foundation for many technologies and industries. From medical diagnostics to semiconductor fabrication, light is making us safer and healthier. Therefore, the [Edmund Optics Innovation Summit 2021 on February 3rd](#) (19:00-23:00 CET) will center around harnessing the power of light, starting off with a keynote presentation from SCHOTT discussing optical glass and trends to inspire future applications that draw upon the latest optical technologies..

Join us as Edmund Optics experts, in partnership with industry experts, focus on glass materials and coating technologies, their fabrication, and how to truly maximize their power in your system, no matter the application. Register now.

Beginn:

Wednesday, February 3, 2021, 7:00 PM Uhr

Ende:

Wednesday, February 3, 2021, 11:00 PM Uhr

Veranstaltungsort:
