

Eplan L!ve

What challenges are machine builders and switchgear system manufacturers facing in today's global markets? How can the right course be set for efficient engineering at an early stage in the game? This year's Eplan L!ve 2023 event on 21 June 2023 is providing distilled answers, highlights from the new version of the software, and demonstrates how Eplan shepherds its customers on every step of their journey from engineering to manufacturing. And it does this from precisely the point where their clients find themselves in their processes. Companies such as Harro Höfliger, Kratos Industries and Sany will present some of their best practices on the world market and provide insights into their workflow practices and engineering methods that allow maximum consistency and efficiency.

Beginn:

Monday, June 12, 2023, 2:00 PM Uhr

Ende:

Monday, June 12, 2023, 4:30 PM Uhr
