# Achieve the impossible report: How to customize Jira reports with simple coding

Join us for an exclusive LinkedIn Live event where we talk about customizing Jira reports to address the "last mile" problem and revolutionize your reporting experience.

The "last mile" issue in reporting often plagues organizations, where data collected in Jira requires extensive post-processing to meet corporate standards (corporate templates, branding, styling etc.) for formal reports, invoices, and more.

Jira reporting, while powerful, has its limitations in customization, hindering users from tailoring reports to their specific needs. In addition, reports created in Jira cannot be easily shared outside the system, which is a challenge for organizations that need to collaborate with external parties.

In this Ask Me Anything live event, we'll show you how to overcome these challenges and unlock the full potential of your Jira reporting capabilities with HTML, CSS and JavaScript.

Points we'll cover:

1. **Addressing the "Last Mile" Problem**: We'll discuss common challenges faced in reporting and how the "last mile" problem arises.

2. **Harnessing the Power of Report Builder**: Join our live coding session demonstrating how Report Builder can simplify complex reporting tasks. We'll walk through practical use cases, including the generation of

custom invoices for single or multiple issues, purchasing offers, and more.

3. **Exploring data aggregation with Actonic's custom data processing library called "Pivotopia":** Get to know a completely new way of manipulating and visualizing data seamlessly.

Beginn:
Tuesday, April 16, 2024, 4:00 PM Uhr
