

LLC-Domain: Launch of Sunrise Period

LLC is - in addition to the well-known inc. - one of the legal forms for a company in the USA. In its design, the LLC depends on the legal regulations of the individual US states. With the help of an LLC domain the name of a company can be represented exactly as a domain: companyname.llc. This creates a very noticeable and memorable domain name. The memorability of the address of a website is the key to successful website marketing.

The Sunrise Period of the LLC domain starts on June 5th and ends on July 5th. Interested parties for the Sunrise Period can register with the [Trademark Clearinghouse](#).

The Sunrise period of the LLC domains is followed by the Landrush period, which begins on July 9 and ends on July 20. General availability of the LLC domains will start on July 23, 2018.
